Research WebUI:

Basics:

- Vue.js
- React
- Data processing via Spring-Boot and html-Formulas (endpoints)

Data Visualization:

- React-vis
    - all the usual types of charts: bar charts, tree maps, line, area, etc.
    - simple and flexible
    - looks good
    - minimalistic

- D3.js
    - Most popular
    - Can do everything you want with graphics
    - Bad documented and hard to learn

- Recharts (favorite)
    - For react User
    - Great performance
    - Every possible chart
    - https://recharts.org/en-US/examples/TwoLevelPieChart

- Chartkick
    - Vue.js
    - Ruby
    - Many possible charts
